

FireEye Helix

Take back control of your security operations

BENEFITS

- Raise your visibility**
 Integrate over 300 FireEye and non-FireEye security tools and overlay nation-grade threat intelligence, rules and analytics to deliver unparalleled situational awareness.
- Accelerate response and minimize the impact of a breach**
 Centralize major security functions and automate workflows with pre-built playbooks informed by frontline experience.
- Reduce total cost of operations**
 Consolidate areas of existing spend including SOAR, SIEM, threat intelligence and security orchestration.

Introduction

Cyber security has never been more challenging. Almost daily, new threats expose companies' vulnerabilities, forcing them to purchase more products and hire more talent. Such reactive approaches lead to escalating complexity — yet another vulnerability attackers can take advantage of. Security operations — big or small — require a holistic, foundational approach. FireEye Helix helps organizations build that foundation.

FireEye Helix is a security operations platform that makes it simple to deliver advanced security to any organization. It surfaces unseen threats and empowers expert decisions with frontline intelligence to take back control of your defenses and capture the untapped potential of your security investments. Available with any FireEye solution, FireEye Helix works as a seamless and scalable foundation to connect and enhance all your security solutions, including non-FireEye products. Designed by security experts, for security experts, it empowers security teams to efficiently conduct primary functions, such as alert management, search, analysis, investigations and reporting.

● ● ●
What FireEye Helix Does

Detect true enemies and understand their behavior

Make informed decisions with contextual threat intelligence

Enhance the efficacy of existing security investments

Threat Analytics

Discover hidden patterns and anomalies in your data to further enrich detection and provide context for the investigative process.

Compliance and Reporting

Use and customize dashboards and widgets to visually aggregate, present and explore the most important information.

Threat Intelligence

Detect, enrich, explore and learn about the latest intelligence threats from FireEye.

Investigative Workbench

Index, archive and search across alert and event data from all sources across the infrastructure to support flexible pivoting and fast hunting.

Automation

Automate and accelerate the investigative and response process via product integrations and codified best response practices of FireEye's frontline responders.

Workflow Management

Organize, assign, collaborate and action steps through the investigative process through automated and manual workflows.

How to Get the FireEye Helix Platform

FireEye Helix is available with the purchase of FireEye's subscription-based solutions. It works across all FireEye technologies and integrates your installed base of non-FireEye security products. As your organization grows and changes, FireEye solutions can be reconfigured, added or upgraded without disrupting organizational operations.
